

## OFFICE 365 SECURITY WEAKNESSES

Your company has chosen or is planning to switch to Microsoft Office 365 to achieve cost benefits and offload a commodity service such as email to a trusted partner. But do you think that this is sufficient to protect your emails against attacks?

### WHAT IS THE LEVEL OF EMAIL PROTECTION OFFERED BY OFFICE 365?

Office 365 proposes two levels of email security options called Exchange Online Protection (EOP) and Advanced Threat Protection (ATP). Both fail in stopping new advanced threats:

- 01** EOP do not detect phishing and spear-phishing attacks, "Safe Links" feature is not available at all.
- 02** EOP have no advanced threat protection of documents to remove active content and other potentially malicious components.
- 03** ATP "Safe Links" feature is unsafe and vulnerable to many evasions as relies on popular domains that are whitelisted by Microsoft.
- 04** EOP and ATP guarantee efficacy against all known threats, but are inefficient against new and evolving threats due to the technologies they use.
- 05** EOP and ATP are not able to disarm links and sanitise active code inside PDFs.
- 06** ATP have no specific protection against business email compromise (BEC) attacks.
- 07** Office 365 filtering is based on secret word list and unknown reputation sources, generating a lot of false positives.

## LIBRAESVA FOR OFFICE 365

Libraesva offers a cloud-based service that protects all your business email in Office 365 with zero impact on email performance.

### INNOVATIVE TECHNOLOGIES AND MULTI-LAYER ENGINE

Libra ESVA completes Office 365 protection by using innovative technologies like the proprietary URLSand and QuickSand Sandboxes and a multi-layer analysis engine to deeply analyze all emails

### MACHINE LEARNING AND ARTIFICIAL INTELLIGENCE

Libra ESVA analyses the behaviour of every email by using machine learning and artificial intelligence algorithms, actively blocking BEC threats.

### SUPERIOR TRACKING AND VISIBILITY

Comprehensive tracking functionalities and one-click full disclosure of all security checks. Centralised view and statistics of all traffic

### EMAIL CONTINUITY

In the event of an Office 365 outage, we keep your email flowing.

### THREAT ANALYSIS PORTAL

Extend Office 365 reporting with Libra ESVA Threat Analysis Portal, knowing information about: geolocalization of malicious domains; percentage of emails blocked; trends on the number of dangerous links and details about documents analyzed by the Sandboxes and targeting your organization.
